Accessories

## PRODUCT INSTALLATION

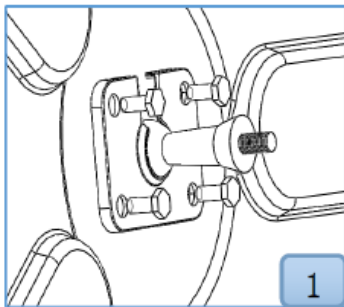

Note: The mirror surface is protected by a layer of film which can be removed when you have finished installing the mirror.

### Installation Steps

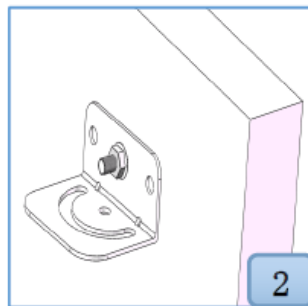

#### Step 1:

Fix the ball part and the cover to back of mirror with M6 Bolts. Then tighten the bolts according to the flexibility of ball part.

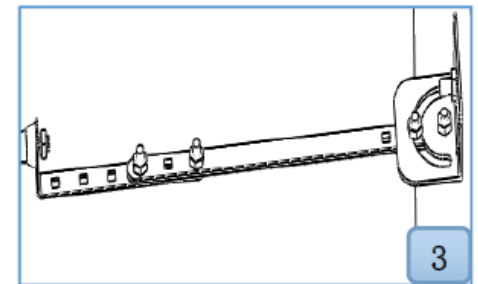

#### Step 2:

Drill a properly positioned hole on the wall or roof for installation and connect the wall part to the wall or roof with an M8 Dilatant Bolt, then adjust the position and fasten them.

#### Step 3:

Connect the ball part fixed into the mirror back to the L part with washer and M8 Nut. Then connect the extended part to L part and wall part with Carriage Bolts, adjust the angle and position, then screw them in. You can use the extended part or not according to different use environments.

**Caution:** When cleaning the mirror, carefully use a soft cloth dampened with water, then dry it with cotton or soft tissue. Do not use any escharotic on the mirror surface.
