KLAH-0050	180°50	PMMA2.0	No back
KLAH-0070	180°70	PMMA2.0	No back

CHARACTERISTICS

- These dome mirrors are made of high-quality PMMA (acrylic)
- PMMA is strong and it is not easy to scratch on the surface. The edge is rubber material
- The installation is very simple. It can be installed under the ceiling directly by screws

SCENARIO APPLICATION

- The dome mirror is widely used to eliminate blind spots and improve surveillance in all types of retail stores, parking lots, warehouses and offices
- There are three kinds of dome mirrors available which can be installed at different locations according to your needs
 - 360° dome mirror: for 4-way intersections, for large area panoramic viewing
 - 180° dome mirror: for 3-way intersections, for large area panoramic viewing
 - 90° dome mirror: for 2-way intersections, for large area panoramic viewing
